AI Full-Stack Engineer · Web, APIs, data and AI, end to end

Open to relocate anywhere · Internship or full-time

Profile

AI full-stack engineer (MCA, 2027) who builds complete products with LLM features inside them: React and Next.js front ends, Node and Python services, real databases, and voice and AI on top. I pair clear architecture with AI coding agents to deliver in less time and at lower cost, then keep the agents honest with specs, schemas and tests. Founder of ProntoPy; built Tonefer (Ubuntu, Windows, Android) and MindMirror (web app + ESP32 AI necklace).

Technical Skills

Languages: TypeScript, JavaScript, Python, Kotlin, Java, C#, SQL, HTML, CSS
Frontend: React, Next.js, Angular, Vite, three.js, responsive & accessible UI
Backend & Data: Node.js, Express, aiohttp, ASP.NET Core, REST, WebSockets, JWT; PostgreSQL, MongoDB, SQLite, Supabase
AI & LLMs: Claude, Groq, OpenRouter, Ollama; prompt design, JSON-schema validation, voice (TTS/STT), ESP32
Engineering: Claude Code, Codex, GitHub Actions CI/CD, Docker, Ubuntu, Vercel, GitHub Pages

Experience

Founder & Developer — ProntoPy (prontopy.com) **2026 – Present**

- Built and run a free platform teaching Python, DSA and AI/ML: 47 modules, 360+ lessons, 940 problems with a LeetCode-style judge, and Python running offline in the browser (Pyodide).

Software Developer Intern — Prasanna Technologies Pvt. Ltd. **Jun 2026**

- Built dynamic, configuration-driven forms and UI components for enterprise software used across the internal platform.
- Debugged backend issues via logs, network tracing and PostgreSQL; worked in sprints with Git and Docker.

Freelance Software Developer — House of Anaika **May 2026**

- Built a headless Shopify storefront (300+ products), a Python lead-generation tool, and moved sales onto Zoho CRM.

IT Head (Freelance) — Government First Grade College, Malur **11 months**

- Ran IT for NAAC accreditation: built a simple data-collection system for faculty, organised evidence by criterion, managed the college website.

Featured Projects

Tonefer — Encrypted Phone ↔ Laptop Transfer (Python, Kotlin) Code

- Offline transfer over a phone hotspot or USB; each payload sealed with XSalsa20-Poly1305 (256-bit key via QR).
- Shipped Ubuntu (.deb) and Windows installers plus a native Android app (Jetpack Compose, share sheet, background delivery); CI builds and tests every release.

MindMirror — Student Wellness App + AI Necklace (React, TS, ESP32) Live

- Spots early stress against a student's own normal, without diagnosing; voice companion via a Node hub (Groq LLM).
- Owned the hub and the ESP32 necklace firmware (INMP441 mic, MAX98357 amp). Built for CODE MEET 2026 at Srinivas University: No. 1 in Round 1, top 5 of 100 teams in Round 2.

Paroh — HumanTwin AI, Consent-First Digital Twin (Next.js, TS) Code

- 24-hour build: journal → facts → user approval → visual twin → what-if simulation → spoken advice.
- Wrote the twin engine (Monte Carlo what-if, fidelity score); hosted LLM via OpenRouter with voice replies.

Education

MCA (Master of Computer Applications) — St Aloysius (Deemed to be University) *2025 – 2027*

Certifications & Workshops

Intro to AI — Oracle · **Programming in Python** — Infosys Springboard · **Cybersecurity** — NPTEL

Leadership & Community

- **Hackathons:** CODE MEET 2026, Srinivas University: No. 1 in Round 1, top 5 of 100 in Round 2 (MindMirror) · GATEWAYS 2026: Round 2 of 150+ teams (Paroh)
- **Co-Founder**, DAT Community · **Host**, Eleven Bytes, a coding event with 25+ colleges
- **Strengths:** Fast learner · Adaptable across web, Android, desktop and hardware · Creative · Team player
