AI Engineer · LLM apps, voice agents and smart devices

Open to relocate anywhere · Internship or full-time

Profile

MCA student (2027) who builds LLM-powered products end to end: a voice companion with an ESP32 necklace (MindMirror), a consent-first digital twin with Monte Carlo what-if simulation (Paroh), and a presenter tool whose AI output is validated data, never executed code (Flow & Magic). I use AI coding agents to ship fast, and keep them honest with specs, schemas and tests. Founder of ProntoPy (includes an AI & ML track).

Technical Skills

Languages: Python, TypeScript, JavaScript, SQL, Java, Kotlin, C#
LLMs & GenAI: Claude, Groq, OpenRouter, Ollama (local Qwen); prompt design, JSON-schema validation, fallbacks
Voice & Devices: speech-to-text and TTS pipelines (Edge TTS, Web Speech), ESP32 firmware (Arduino C), I2S audio
ML foundations (building): NumPy, Pandas, scikit-learn, Monte Carlo simulation; PyTorch (learning)
Apps, Data & Tools: React, Next.js, Node.js, PySide6; PostgreSQL, SQLite; Git, Docker, Claude Code, Codex

Experience

Founder & Developer — ProntoPy (prontopy.com) **2026 – Present**

- Built and run a free platform teaching Python, DSA and AI/ML: 47 modules, 360+ lessons, 940 problems with a LeetCode-style judge, and Python running offline in the browser (Pyodide).

Software Developer Intern — Prasanna Technologies Pvt. Ltd. **Jun 2026**

- Built dynamic, configuration-driven forms and UI components for enterprise software used across the internal platform.
- Debugged backend issues via logs, network tracing and PostgreSQL; worked in sprints with Git and Docker.

Freelance Software Developer — House of Anaika **May 2026**

- Built a headless Shopify storefront (300+ products), a Python lead-generation tool, and moved sales onto Zoho CRM.

IT Head (Freelance) — Government First Grade College, Malur **Jun 2023 – Apr 2024**

- Ran IT for NAAC accreditation: built a simple data-collection system for faculty, organised evidence by criterion, managed the college website.

Featured Projects

MindMirror — Student Wellness App + AI Necklace (React, TS, ESP32) Live

- Spots early stress against a student's own normal, without diagnosing; voice companion via a Node hub (Groq LLM).
- Owned the hub and the ESP32 necklace firmware (INMP441 mic, MAX98357 amp). Built for CODE MEET 2026 at Srinivas University: No. 1 in Round 1, top 5 of 100 teams in Round 2.

Paroh — HumanTwin AI, Consent-First Digital Twin (Next.js, TS) Code

- 24-hour build: journal → facts → user approval → visual twin → what-if simulation → spoken advice.
- Wrote the twin engine (Monte Carlo what-if, fidelity score); hosted LLM via OpenRouter with voice replies.

Flow & Magic — Live Visual Explanations for Presenters (React, TS) Code

- Typed, spoken and gesture input summon animated diagrams; visuals are validated JSON descriptors drawn by custom SVG renderers, so AI output is never executed.
- Built in small vertical slices with AI coding agents, guarded by architecture decision records and 131 automated tests.

Education

MCA (Master of Computer Applications) — St Aloysius (Deemed to be University) *2025 – 2027*

Certifications & Workshops

Intro to AI — Oracle · **Programming in Python** — Infosys Springboard · **Cybersecurity** — NPTEL

Leadership & Community

- **Hackathons:** CODE MEET 2026, Srinivas University: No. 1 in Round 1, top 5 of 100 in Round 2 (MindMirror) · GATEWAYS 2026: Round 2 of 150+ teams (Paroh)
- **Co-Founder**, DAT Community · **Host**, Eleven Bytes, a coding event with 25+ colleges
- **Strengths:** Fast learner · Adaptable across web, Android, desktop and hardware · Creative · Team player
